|---------------|--|------------------|--------------------|--------------------|--------------------|--------------------|--------------------------------|---------------|----------|----------------------------|----------------------|-------------|
| 6             | Create and implement an Adaptation/Hazard Mitigation Plan by 2014 to ensure that natural, built, and social systems are resilient to all disasters, including conditions that are increasing with climate change such as heat waves, downpours, sea level rise (in the tidal Potomac), and stronger coastal storms. The plan should include a comprehensive Vulnerability Assessment, and prioritize no/low-regrets actions with greenhouse gas reduction co-benefits. |                  |                    |                    |                    |                    |                                |               |          |                            |                      |             |
|               | The District's Comprehensive Plan and all development plans (Small Area Plans, PUDs, etc) will use the best available science to consider the future climate change impacts on buildings and developments, such as increased inland flooding and sea level rise. These plans will restrict building in vulnerable areas and incentives will be developed for resilient design practices. Proof of insurance that Includes climate impact risk will be required.        |                  |                    |                    |                    |                    |                                |               |          | OP, DC<br>Council?         |                      |             |
|               | Capitalize on nature's buffering capacity by employing nature-<br>based green infrastructure such as tree canopy, rain gardens,<br>wetlands, open space, and green roofs to reduce urban heat<br>island effect, and subsequently energy costs; manage<br>stormwater and flooding; and improve air quality.   |                  |                    |                    |                    |                    |                                |               |          | DDOE, DDOT,<br>DPR         |                      |             |
|               | Design transportation systems to be resilient to extreme weather events and other weather/climate impacts (such as heat waves, storms, sea level rise, flooding) by incorporating margins of safety in materials design, maintenance and operations, emergency response, and infrastructure design/location.   |                  |                    |                    |                    |                    |                                |               |          | DDOT, Metro                |                      |             |
|               | The DC Climate Adaptation plan should assess and enhance the resiliency of vulnerable populations to heat waves, flooding, sea level rise and other disasters and extreme weather events, by implementing education, outreach and supportive programs.   |                  |                    |                    |                    |                    |                                |               |          | DOH                        |                      |             |
|               | Strengthen the District's heat emergency response plan to ensure adequate cooling for all citizens, including accessible cooling centers, etc  |                  |                    |                    |                    |                    |                                |               |          | DOH, Homeland<br>Security  |                      |             |
|               | Stormwater management facilities should be based on a design storm with 25% higher volume than historic levels due to climate change (similar to NCPC and Alexandria design recommendations).  |                  |                    |                    |                    |                    |                                |               |          | DDOE, DC<br>Water, DDOT    |                      |             |
|               | DC Water should plan for higher demand during heat waves due to climate change, and enhance resiliency through conservation and reuse programs.  |                  |                    |                    |                    |                    |                                |               |          | DC Water                   |                      |             |

| 18            | [GREEN SPACE MAINTENANCE] Ensure that the District's greenspaces and green infrastructure is managed and maintained in a sustainable manner by creating a structured and sustainable educated workforce to maximize effectiveness and protection.  1. By 2014, every government agency that has responsibility for public greenspace areas will have a dedicated department and/or one dedicated city employee to oversee greenspace/infrastructure management.  2. By 2013, a "Green 311" call line/website will be implemented for reporting greenspace public safety concerns.  Confirmation/call back will be assured for each reported incident.  3. By 2013, an updated and current maintenance schedule for parks and public greenspaces will be accessible to the public.  4. By 2013, green infrastructure on government/federal property will have an updated and current maintenance schedule/scheduled maintenance plan.  5. By 2014, government agencies will be encouraged to partner with non-profits, CSOSA, volunteer organizations, CSO's, DCPS and college community service groups to help with greenspace maintenance.  6. By 2016, job training programs/college/high school curriculum will be required to educate and provide certification for green infrastructure maintenance and related green job skills.  7. ANC offices should become conduits for reporting maintenance issues.  Actors:  DGS, DPR, DPW, DDOE, DDOT, DCPS, CSOSA, NPS, AWS, ECC. SCC. Anacostia River Keeper. Groundwork Anacostia |                  |                    |                    |                    |                    |                                |               | Green Economy |   | City Council legislation, Mayor's Order; assessment of maintenance issues, maintenance plan(s); staffing to implement  |   |
| 19            | [PROTECT MATURE TREES] Identify the city's most valuable and vulnerable mature trees and develop protection and maintenance plan, and implement.   |                  |                    |                    |                    |                    |                                |               |               | Casey Trees,<br>DDOT, DDOE,<br>NPS                | Create parallel protection and restoration program to Riversmart, but with emphasis on stabilization and protection of trees in danger zones. Include street trees, privately held trees, local and federal parklands. Align with terrestial habitat agenda (trees are ecosystems). Funding. Expert and citizen surveys, professional and citizen forester volunteers; Green Summer Job participants |   |
|               | [FEDERAL-DC PARTNERSHIPS] Working off the CapitalSpace partnership initiative, DC Government builds a working relationship with the federal government to move forward on projects such as the RFK revitalization and Oxon Run Park improvements.  |                  |                    |                    |                    |                    |                                |               |               | NPS   | Political commitment by NCPS, DDOE, DPR, NPS to CapitalSpace initiative.   | Functioning CapitalSpace program. Progress on RFK revitalization on Oxon Run Park improvements. |
| 21            | [INVASIVE WILDLIFE] Control invasive plants, geese, deer, and fish through improved management. Who: DC Fisheries and Wildlife, NPS, community volunteers, non-profits   |                  |                    |                    |                    |                    |                                |               | Water         | DDOE, NPS,<br>Humane<br>Society, City<br>WIldlife |  |   |

|-------------|--|------------------|--------------------|--------------------|--------------------|--------------------|--------------------------------|---------------|--|---|--|--|
| 8           | Within 12 months, the Mayor and DC Council will propose a region-wide beverage container deposit legislation to the Chesapeake Executive Council.  |                  |                    |                    |                    |                    |                                |               | Built<br>Environment,<br>Green Economy,<br>Water | Mayor,<br>Chesapeake<br>Bay state<br>governors, EPA<br>Administrator  | In 12 months, a region-wide bottle bill will be proposed and in 2013, campaign team is formed to work on the legislation.  | Get stakeholder and community group involvement, MD and DC need to collaborate (VA probably won't). Do an audit on recycling rates in MD, DC to see the baseline for Bottle Bill efficacy. Study different bottle bills models to ensure DC/MD has a system that works and succeeds in the region. Collect data on public opinion and impacts of beverage containers.  |
| 9           | The District government will establish the framework for C&D recycling and certification by 2015. The DC Council will pass legislation requiring a minimum C&D recycling rate of 75% for all LEED certified buildings in DC. Only an ISO certified facility can issue recycling documentation. By 2014, Mayor Gray shall introduce legislation requiring all new construction and major renovation projects to recycling and/or reuse 75% (?) of C&D debris. Contractors/owners (?) must provide documentation prior to obtaining certificate of occupancy. The legislation must include a mandatory salvage period before demolition such that licensed salvagers have the opportunity to salvage items. There will need to be a mechanism to track what salvagers collect in order to demonstrate the C&D recycling/re-use rate. |                  |                    |                    |                    |                    |                                |               | Built<br>Environment                             | DCRA, DPW,<br>Mayor / Council,<br>private salvage<br>companies,<br>community<br>forklift, habitat<br>for humanity,<br>junk in the<br>trunk, Brass<br>Knob, DCBIDA,<br>Washington<br>BIDG<br>congress(?) | C&D rubbish, recycling, and re-use rates are not currently tracked. Tracking must be implemented ASAP in order to set a baseline. Indicators of success will be decreased C&D rubbish generation rates and increased C&D recycling and re-use rates. | introduce legislation, develop implementation plan. Funding will probably be via a permit fee or deposit. Ideas include 1 - Consider charging a refundable deposit as part of the building permit. When proper documentation of C&D recycling rate is provided, the C of O is issued and the deposit is returned. 2 - Consider making the refund on a sliding scale: 75% recycle/re-use = refund of 75% of the deposit (so a 25% fee), 80% recycle/re-use = refund of 80% of the deposit (a 20% fee), 90% recycle/re-use = refund of 90% of the deposit (a 10% fee). |

| Final<br>Rank | Goal/Action  | Econ<br>Benefits | Enviro<br>Benefits | Health<br>Benefits | Social<br>Benefits | Level of<br>Effort | Benefit<br>Relative<br>to Cost | Time<br>frame | Overlaps | Agencies<br>or<br>Partners  | Indicators & Metrics  | Action Type   |
|---------------|--|------------------|--------------------|--------------------|--------------------|--------------------|--------------------------------|---------------|----------|---|---|---|
| 10            | By 2018, the District government shall create financial incentives to encourage organics recycling; design tax incentives/economic incentives to promote recycling and reuse, including organics and waste oil.                            |                  |                    |                    |                    |                    |                                |               |          | DPW, OCFO. For waste oil: DDOT, DCRA, BIDs, DPW, DDOE, WASA (oils and fats are a problem for them), DOH (currently regulates restaurant oil and fat) DC Biofuels, Keystone, Greenworks, Greenlight, Envirelation, other Sm. Businesses, private biodiesel production company, restaurants, A panel of residents using WVO and biodiesel for cars and home boilers, A panel of small businesses using WVO and biodiesel for operations | By the 20115, need a compost facility, residents have compost toters, 2015-20% of residents participating; 2018-40% of residents participating; 2022-75% of residents participating. # of registered alternative fuel users/manufacturers, % of collected grease that remains in DC for reuse | Policy to have recycling and composting covered by tax and trash hauling service needs to be paid out of pocket. Study incentives and pricing based on container sizes and collection rates (times/week that truck comes around), for pilot. Retrofit trucks/contract private collectors. Set up a grease exchange to help residents who need used cooking oil (for fuel or home heating) to collect it from businesses, and to help residents who need to discard used cooking oil find a place to dispose of it properly. Funding: 'Recovered road taxes' (one of the problems that people have with biodiesel and grease use is that DIYers aren't paying road taxes when they purchase fuel, although they still use roads. California charges a tax per gallon of fuel you used, this is calculated on an honor system). Saved fuel costs?  A Registration fee for processors (on a sliding scale so that DIYer pay very little). Reg development will take funds, but after that registration fees should cover an inspection program and a technical assistance program (mainly for DIYers), Air Quality grant (? Is there such a thing?)  Pollution Prevention grant(?)  WASA grant or subsidy (less grease in the sewer would benefit them), |
| 11            | The District will enact a 10 cent fee on the retail sale of disposable plastic containers and a 50 cent fee on retail packing materials sold. Funds to Anacostia Restoration and Recovery Fund. DDOE to enforce the fee. Ban both by 2020. |                  |                    |                    |                    |                    |                                |               |          | DPW, OCFO,<br>DDOE  | Start the fee in 2014, ban on polystyrene containers in 2020, ban on retail packing materials by 2020   | policy, need to research and strategize<br>the best plan after comparison to other<br>cities, collect data on the impacts of<br>polystyrene containers, including litter,<br>health and others.   |
| 13            | The DC Council shall create a special committee to develop a regulatory framework which allows on-site composting (up to x amount with proper stormwater, aerate, and leachate controls) at private and public facilities by 2013.         |                  |                    |                    |                    |                    |                                |               |          | DPW, DDOE,<br>EPA,<br>composters,   | Committee created and regulation created.   | Come up with what ("X") amount constitutes as on-site composting.   |

| Final<br>Rank | Goal/Action   | Econ<br>Benefits | Enviro<br>Benefits | Health<br>Benefits | Social<br>Benefits | Level of<br>Effort | Benefit<br>Relative<br>to Cost | Time<br>frame | Overlaps      | Agencies<br>or<br>Partners  | Indicators & Metrics  | Action Type   |
|---------------|---|------------------|--------------------|--------------------|--------------------|--------------------|--------------------------------|---------------|---------------|---|---|---|
| 14            | MPD shall 1) expand its fourth district litter enforcement pilot to the entire city, 2) participate in litter enforcement month (April) annually, 3) establish tracking and reporting mechanism for citations, 4) re-establish the environmental crimes unit by 2013, and 5) the District shall establish an environmental crimes court by 2015. Current business recycling regulations must be enforced. |                  |                    |                    |                    |                    |                                |               | Green Economy | DPW, MPD,<br>DDOE, District<br>of Columbia<br>Courts, Alice<br>Fergusson<br>foundation,<br>River Keepers,<br>WASA   | track the amount of trash removed from rivers and streams (the band-a-longs and also clean up events) and track the amount of trash removed from streets by street sweepers. The amounts should decrease over time. Track litter citations issued. Less litter and less illegal dumping should result in less vermin and an improvement in stream water quality and the overall livability of the city. | Current business recycling regulations must be enforced. Establish the new court. Re-establish environmental crimes unit (or similar). Develop method to catch illegal dumpers in the act (sting operation?). fines could provide some of the funds for the program   |
| 15            | The District shall form a taskforce to explore waste-to-energy and waste conversion technology options outside of incineration / mass burn for the District by 2013. The task force must take into consideration decreased C&D waste levels (i.e. less wood will be available ) driven by another line item.  |                  |                    |                    |                    |                    |                                |               | Energy        | public utilities,<br>DMPED, DDOE-<br>AQD, DDOE-<br>Energy office,<br>DDOE-HW<br>program, DPW,<br>private waste<br>management<br>companies,<br>Sustainable<br>Energy Utility | blank   | Form task force. Funding: placing a waste to energy unit at Ft Totten would allow the energy to be provided to METRO due to proximity. The energy would offset the District's financial contribution to METRO's operating expenses.   |
| 16            | By 2014, DPW will incentivize composting and recycling by residents receiving city-provided collection services. Options to investigate include decreasing the size of trash cans, charging a fee to acquire a larger trash can, providing larger recycling cans (for free), providing additional recycling cans (for free), and implementing a pay-as-you-throw plan for rubbish or true-waste.          |                  |                    |                    |                    |                    |                                |               |               | DPW, private<br>haulers (i.e.<br>DPW could<br>subcontract<br>composting to a<br>private hauler?)  | Quantities of recycling and 'rubbish' collected by the city are currently tracked, decreased rubbish generation will be evident over time   | Composting needs to be facilitated (addressed under another line item). Community education in recycling and composting will be required, consider using the summer student program to provide small group training sessions at the community, neighborhood, ANC, or street level. Funding: Pay as you throw will offset some expenses. Decreased rubbish quantities will result in decreased tipping fees at landfills. Composting should be less expensive than rubbish collection and land filling. Consider allowing advertising on cans to fund this initiative. |

| Final<br>Rank | (50al/Action   | Econ<br>Benefits | Enviro<br>Benefits | Health<br>Benefits | Social<br>Benefits | Level of<br>Effort | Benefit<br>Relative<br>to Cost | Time<br>frame | Overlaps | Agencies<br>or<br>Partners  | Indicators & Metrics               | Action Type   |

| 19            | By 2015, 75% of DC residents will be within walking access to a mobile HHW and Special Collections (reusable home goods, recycling, electronics, medical, composting) Recycling Facility that will make scheduled, advertised trips to each ward throughout the year and service each ward at least twice a year. This will ease the tension of communities that do not have access to recycling. |                  |                    |                    |                    |                    |                                |               |          | Knob, DCBIDA,<br>Washington<br>BIDG | decreased rubbish generation rates; participation, access provided, number of advertisements through terrestrial and online media as well as community groups utilized to get the word out. | Identify locations for collection points, set limitations on items allowed (no fire arms, prescription medications, etc). Identify mechanism to transfer items to their next location (compost site, reuse site etc). Educate the public about composting. Funding: rubbish management costs will decrease resulting in funds being available to pay for composting, E-waste management, and HHW management. |
| 22            | By 2013, Mayor Gray shall issue an order requiring the Office of Contracting and Procurement to establish an expanded list of environmentally preferable products (including electronics and disposable recyclable or compostable products/diningware) that District government should purchase and establish a tracking system for procurement in order to track purchases                       |                  |                    |                    |                    |                    |                                |               |          |                                     | % agencies using tracking system, % purchases tagged as environmentally preferential, and number and % of agency purchasing officers briefed on environmental purchasing requirements.      |  |
| 24            | Every five years, the District will conduct a waste composition and generation study to measure progress towards reducing the waste generated in the District   |                  |                    |                    |                    |                    |                                |               |          |                                     |   |  |

| Final<br>Rank | Goal/Action  | Econ<br>Benefits | Enviro<br>Benefits | Health<br>Benefits | Social<br>Benefits | Level of<br>Effort | Benefit<br>Relative<br>to Cost | Time<br>frame | Overlaps  | Agencies<br>or<br>Partners   | Indicators & Metrics  | Action Type   |
|---------------|--|------------------|--------------------|--------------------|--------------------|--------------------|--------------------------------|---------------|---|--|---|---|
| 27            | By 2013, DPW, DGS, and DDOE will integrate and launch a multi-media anti-littering awareness campaign based in local imagery and diversity, including pet waste, cigarette butts, and tires. The campaign shall utilize the visuals and interjurisdictional impact of the Regional Litter Prevention Campaign and the outreach tactics of Not In OUR DC!.  |                  |                    |                    |                    |                    |                                |               | Nature, Water,<br>Transportation,<br>Built<br>Environment |  |   |   |
| 29            | The District government shall engage in the national discussion on Extended Producer Responsibility, including product stewardship and producer takeback of difficult to recycle items and smart packaging. Investigate option of a national program or partnering with neighboring states.  |                  |                    |                    |                    |                    |                                |               |   |  | % of population impacted, diversity of modes of outreach, number and diversity of community groups utilized to get the word out, number of school presentations given on litter prevention and awareness. |   |
| 30            | Businesses should use/provide products with simple and responsible reuse and takeback options  |                  |                    |                    |                    |                    |                                |               |   |  |   |   |
|               | By 2016, DCRA will work with DPW and DOH to develop a permitting scheme whereby contiguous businesses can share a single disposal/recycling/composting container that may be in public space. There shall be a process to review and approve innovative business resource management plans. Example: allow 3 neighboring businesses to share one rubbish bin, one recycling bin, and one compost bin   |                  |                    |                    |                    |                    |                                |               |   | DOH, DCRA,<br>DPW, small<br>businesses,<br>apartment<br>complexes                    |   | modify any policies that mandate or imply that each business must contract for non-shared recycling and rubbish collection bins. Develop an innovation support and review program and / or a small business technical assistance program. |
| 32            | Grassroots support, community for small-scale backyard composting, community gardens   |                  |                    |                    |                    |                    |                                |               |   |  |   |   |
|               |  |                  |                    |                    |                    |                    | Water                          |               |   |  |   |   |
| 1             | (1) Expand Green Infrastructure / Low-Impact Development - 100% of new public space/right of way projects (roads, alleys, sidewalks) will utilize LID (e.g. curb cuts with rain gardens, tree planting, bayscaping, biorention cells) to treat the first 1.2" of runoff. Additionally retrofit 25% of right of way. If the 1.2" standard cannnot be met in the ROW of the project area, the difference will be made up in other ROW offsets. |                  |                    |                    |                    |                    |                                |               |   | acres of LID<br>retrofit, percent<br>District land,<br>percent federal<br>land       |   | DDOT, DDOE, DC Water,   |
| 2             | (2) Reuse greywater - Remove regulatory barriers and incentivize the capture and reuse of nonpotable water resources   |                  |                    |                    |                    |                    |                                |               |   | number of<br>systems<br>installed,<br>volume<br>captured,<br>percent smart<br>meters | Strategy for quantifying use, Identify barriers, develop incentive  | DC Water, DCRA, Dept. of Health,<br>DDOE  |
| 3             | (1) Expand Green Infrastructure / Low-Impact Development - Retrofit 100% of District-owned schools, recreation centers and libraries (DCPS + Charters, DPR, DCPL) with LID as they are modernized to retain and reuse all stormwater   |                  |                    |                    |                    |                    |                                |               |   | percent of<br>facilities<br>retrofitted  |   | DDOE, DCPS, DPR, DCPL, OSSE, DGS  |

| Final<br>Rank | Goal/Action   | Econ<br>Benefits | Enviro<br>Benefits | Health<br>Benefits | Social<br>Benefits | Level of<br>Effort | Benefit<br>Relative<br>to Cost | Time<br>frame | Overlaps | Agencies<br>or<br>Partners   | Indicators & Metrics   | Action Type  |
|---------------|---|------------------|--------------------|--------------------|--------------------|--------------------|--------------------------------|---------------|----------|--|--|--|
| 4             | (3) Reduce Stormwater / Improve Stormwater Retention & filtration on buildings & lots - Increase tree canopy cover by 25% to help restore water retention and natural hydrology   |                  |                    |                    |                    |                    |                                |               |          | percent canopy<br>cover  |  | DDOE, DDOT, DGS, NPS   |
| 5             | (1) Expand Green Infrastructure / Low-Impact Development - Incentivize LID on private property by expanding the RiverSmart suite of programs for residents and businesses to install LID and increase impact by targeting critical facilities (e.g. parking lots and large properties)              |                  |                    |                    |                    |                    |                                |               |          | Number of<br>properties<br>retrofitted,<br>number of acres<br>retrofitted,<br>reduction of<br>stormwater<br>utiliity fee   |  | DDOE, DC Greenworks, Anacostia<br>Watershed Initiative, ASLA |
| 6             | (4) Prevent trash and pollutants from entering the District's waters - Develop legislation for and pass a 'Bottle Bill' to reduce plastic bottle trash  |                  |                    |                    |                    |                    |                                |               |          | legislation exists<br>within 5 years,<br>number of<br>bottles<br>collected,<br>reduction in<br>bottles found in<br>waterways   | revisit amount of deposit or tie to inflation  | DDOE, DGS, Council   |
| 7             | (1) Expand Green Infrastructure / Low-Impact Development - Measure, monitor and develop performance metrics for the installation and maintenance of LID; use university partnerships to do studies on resulting water quality outcomes to see if goals are being reached in a cost effective manner |                  |                    |                    |                    |                    |                                |               |          | Number of<br>reports, number<br>of metrics,<br>number of best<br>practices<br>identified,<br>number of<br>partnerships,<br>number of new<br>regulations as<br>result | determine scope of reports, create partnerships, develop new regulations based on report         | District universities  |
| 8             | (1) Expand Green Infrastructure / Low-Impact Development - Create a permanently funded LID maintenance corps to take care of LID installments and increase job opportunities in the District  |                  |                    |                    |                    |                    |                                |               |          | of LID facilities  | Determine funding source, identify similarly structured corps, identify governing agency/partner | DDOE, DOES, DGS  |
| 9             | (3) Reduce Stormwater / Increase - Minimize incidents of combined sewer overflows   |                  |                    |                    |                    |                    |                                |               |          | Percent of CSO<br>reductions,<br>number of CSO<br>events   |  | DC Water, DDOE   |

| Final<br>Rank | (±03l/Action  | Econ<br>Benefits | Enviro<br>Benefits | Health<br>Benefits | Social<br>Benefits | Level of<br>Effort | Benefit<br>Relative<br>to Cost | Time<br>frame | Overlaps | Agencies<br>or<br>Partners  | Indicators & Metrics       | Action Type   |
|---------------|---|------------------|--------------------|--------------------|--------------------|--------------------|--------------------------------|---------------|----------|---|----------------------------|---|
| 10            | (5) Restore Natural Habitat to the District's Waters and surrounding Ecosystems - Assess and increase the number acres of wetlands planted along the Anacostia and Potomac to create buffers for wetlands and streams, and habitat corridors for wildlife (inc. study the removal of seawalls)  |                  |                    |                    |                    |                    |                                |               |          | number of acres<br>of wetlands<br>created, linear<br>feet of seawall<br>removed,<br>percent of<br>seawall<br>removed,<br>percent<br>increase in<br>wetlands |                            | DDOE, NPS, Army Corps of<br>Engineeers              |
| 11            | (6) Find a permanent funding stream to sustainably fund rlated programs - Create a permanent DC revolving fund dedicated to sustainability (which cannot be returned to general funds) that includes the construction and maintenance of green infrastructure   |                  |                    |                    |                    |                    |                                |               |          | total amount of<br>money<br>dispersed from<br>fund, amount of<br>money in fund,<br>annual amount<br>of funds<br>dispersed                                   | Identify funding source(s) | DDOE, Budget office                                 |
| 12            | (5) Restore Natural Habitat to the District's Waters and surrounding Ecosystems - Continue pace of at least one stream (including daylighting) or outfall restoration project a year with a goal of restoring all tributaries by 2032   |                  |                    |                    |                    |                    |                                |               |          | number of<br>stream,<br>daylighting,<br>outfall projects<br>per year,<br>percent of<br>streams<br>restored  |                            | DDOE  |
| 13            | (6) Increase Public Access to, and Recreational Opportunities in, the District's Waters - Expand signed hiking/biking trails, sports facilities, boardwalks, parks and recreational areas, boat ramps and docks on the Potomac and Anacostia Rivers in key areas of redevelopment (e.g. RFK, Poplar Point, Kenilworth Aquatic Gardens, SW Waterfront, Capital Riverfront) |                  |                    |                    |                    |                    |                                |               |          | number of miles<br>of trails, usage<br>of facilities,<br>number of<br>access points,<br>acres of<br>recreational<br>facilities                              |                            | DDOE, DPR, DDOT, NPS, RFK,<br>Arboretum, Developers |

| Final<br>Rank | Goal/Action   | Econ<br>Benefits | Enviro<br>Benefits | Health<br>Benefits | Social<br>Benefits | Level of<br>Effort | Benefit<br>Relative<br>to Cost | Time<br>frame | Overlaps | Agencies<br>or<br>Partners   | Indicators & Metrics  | Action Type                            |
|---------------|---|------------------|--------------------|--------------------|--------------------|--------------------|--------------------------------|---------------|----------|--|---|--|
| 14            | (3) Reduce Stormwater / Improve Stormwater Retention & filtration on buildings & lots - Adopt building codes that raise the standard for water efficiency for existing buildings, and incentivize code performance for new and existing buildings |                  |                    |                    |                    |                    |                                |               |          | number of<br>existing<br>buildings<br>retrofitted to<br>new standards,<br>develop high<br>volume user<br>surcharge | Identify current codes, submit and pass legislation   |  |
| 15            | (7) Build Relationships with the Jurisdictions that share our Waterways - Develop and implement an interstate compact with MD to set limits on all pollutants   |                  |                    |                    |                    |                    |                                |               |          |  | additonal resources needed for Universities, define "pollutants" (should be beyond just toxins) | MD, Council, DDOE                      |
| 16            | (8) Make clean and affordable drinking water available to everyone - Expand and enhance the accessibility of drinking water in public spaces  |                  |                    |                    |                    |                    |                                |               |          | number of<br>public drinking<br>water points (#<br>District, #<br>federal), number<br>of Tap It<br>locations       |   | DC Water, DPR, NPS, private businesses |

| Final<br>Rank | Goal/Action   | Econ<br>Benefits | Enviro<br>Benefits | Health<br>Benefits | Social<br>Benefits | Level of<br>Effort | Benefit<br>Relative<br>to Cost | Time<br>frame | Overlaps | Agencies<br>or<br>Partners   | Indicators & Metrics            | Action Type                      |
|---------------|---|------------------|--------------------|--------------------|--------------------|--------------------|--------------------------------|---------------|----------|--|---------------------------------|----------------------------------|
| 17            | (9) Demonstrate and test best practices through District Gov't pilots - Use large parcels and iconic DC sites (e.g. Walter Reed, St. Elizabeths East) as demonstration projects for sustainable water techniques and technologies, potentially leading to a long-term requirement to only use greywater in government watering/irrigation |                  |                    |                    |                    |                    |                                |               |          | number of facilities developed/rede veloped with sustainable water techniques, new LID requirements based on results of demonstration projects, percent of District irrigation using greywater |                                 | DMPED, OP, DDOE                  |
|               | (8) Make clean and affordable drinking water available to everyone - Develop District-wide educational campaign about water efficiency/conservation delivered by an objective their party   |                  |                    |                    |                    |                    |                                |               |          | reductions in water use, increase in understanding of water efficiency, reduction in purchase of bottled water purchases   | Develop curriculum and campaign | DCPS, DC Water, DDOE, OCT        |
|               | (10) Prevent trash and pollutants from entering the District's waters - Reduce trash in District rivers and streams, particularly targeting sources of prevalent trash such as plastic water bottles  |                  |                    |                    |                    |                    |                                |               |          | tons of trash<br>removed,<br>percent<br>reduction in<br>trash found in<br>waterways  |                                 | DDOE, Groundworks Anacostia, AWI |
